

## Peach to Introduce Airbus A321XLR and A321neo

- **Three A321XLR and ten A321neo aircraft ordered**
- **Scheduled to be received sequentially from 2032**

Osaka, February 25, 2025 - Peach Aviation Limited ("Peach"; Representative Director and CEO: Kazunari Ohashi ) announced that it had ordered three A321XLR and ten A321neo aircraft through its parent company, ANA Holdings Inc.

The A321XLR has a longer range than the A321LR, which was developed based on the A321neo, with the world's longest maximum range for a single-aisle aircraft, 8,700km<sup>\*1</sup>, which can cover flights to Asia and Oceania from Japan. Peach has already introduced three A321LR aircraft. The A321LR has a seat pitch 5 to 10 cm wider than the A320ceo and A320neo, which are used on domestic and short-haul international routes. The A321LR offers a comfortable cabin space on flights from Osaka (Kansai) to Bangkok (Suvarnabhumi) and Singapore. In addition to the A321LR, the introduction of the A321XLR will allow us to serve even more cities on medium-haul international routes.

The A321neo is the model on which the above-mentioned A321LR and A321XLR are based. Peach currently uses the A320ceo and A320neo as its main fleet for domestic and short-haul international routes, and the A321neo will be introduced as replacements for these aircraft. While the overall length will increase by approximately 7 meters, CO<sub>2</sub> emissions and fuel consumption are expected to be reduced by approximately 20% making it a model that excels in both environmental and economic performance.

The aircraft ordered this time are scheduled to be received in stages from 2032 onward.
